CNI Locates partners with companies that specialize in exploration, drilling/boring, and extraction to locate all subsurface utilities and structures in their work area. Striking utilities while performing subsurface work can be expensive, dangerous, time consuming, and harmful to a company's reputation. CNI Locates helps to minimize the risk of subsurface damages and compliments your efforts to confirm the viability and placement of your desired work area. Let CNI Locates be your one stop shop for subsurface damage prevention.

CNI Locates has extensive experience when it comes locating subsurface utilities along pipelines, gathering pipelines, and transmission lines containing natural gas, petroleum, oil, etc. Terminals, LNG Terminals, storage facilities, etc. are among some other locations that need utility locates before performing subsurface work.

When working inside of facilities such as oil refineries, petrochemical plants, petroleum product distributors, and natural gas distribution companies the risk posed by subsurface work is very high. There are often complex mazes of utilities that must be located prior to performing any subsurface work. CNI Locates has all the technology needed to mark out utilities inside and outside of your facilities, resulting in safe and successful subsurface work.

CNI Locates partners with gas stations and petroleum distributors to locate their subsurface utilities. Whether you are performing soil testing, facility upgrades, installing a new pump island, installing a sign, etc. CNI Locates has all the technology needed to accurately mark your subsurface structures/utilities. CNI Locates has the ability to be on site within 24 hours notice (Monday - Friday).
